PROJECTS

Github - **github.com/someshtupte**

Personal Portfolio Website - https://someshtupte.netlify.app/

This mobile responsive website helps to showcase my skills and personal projects. This website is built with the help of **React, SCSS, HTML** and **Icon Packages in React.**

Website for the Real Estate Business using MERN technology

This website works as a marketplace for the real estate projects. Website uses multiple real world functionalities like **Google Auth**, User Login, State Management using **React-redux , CSS - Tailwind CSS, React-router** for routing.

Whatsapp Clone using Flutter

Have developed a UI Clone using the flutter framework. This app mimics the UI of the whatsapp and the features it provides.

SKILLS   PROFICIENCY
